PROJECTPROFILE

BunSek Web Application.

BunSek is a YouTube comment analysis web application that utilizes OAuth 2.0 to access Google APIs, specifically YouTube APIs, for retrieving data. The application stores user information and YouTube comments in the pgAdmin-4 database. It includes a core engine feature that allows users to filter and view negative and positive comments. Additionally, users can hide comments as needed. The app also integrates HDFC Payment Gateway services.

Technologies Used:

Laravel10 Vue Inertia.js pgAdmin4

Traceability Windows Application.

This project analyzes data from industrial machines by reading information from a PLC (Programmable Logic Controller) via IP address. The data is retrieved in binary format and saved in ASCII format, with storage in an MS SQL Server database. This data listed in windows application and tracking OP machines.

Technologies-Used:

.Net Framework C#, WPF SQL Server (Visual Studio Community-2022) IDE,

FD Plus KB-Knowledge Base (biomechanics Data)

This is a Windows-based application designed for a sports hospital to analyze patient symptoms and initiate prescriptions in collaboration with expert doctors

Technologies Used .Net Framework C#, WPF SQL Server.
